

CAP Cancer Protocols Summary of Changes September 16, 2026

	Protocol	Protocol Version Number	eCP Version Number	Summary of Changes
1	Breast, Phyllodes Tumor Accreditation Change	1.2.0.0	1.002.001	• Protocol now required for accreditation for malignant phyllodes • WHO 6th Edition updates to content and explanatory notes • Update to "Tumor Site" question • Updates to instructional Display Items (Histologic Type, Stromal Overgrowth, Mitotic Rate, Histologic Tumor Border, and Margin Status) • Addition optional Tumor Necrosis question • Updates to MARGINS and ADDITIONAL FINDINGS sections • pTNM Classification section updates to include the addition of Modified Classification and T Suffix • eCP only ASCII technical update
2	Breast, Biomarker	1.6.2.0	1.011.001	• Updates to Scoring System and specific scoring criteria for ER, PgR, and HER2 by IHC and ISH • Formatting update for Negative (Score 0+) answer for HER2 by Immunohistochemistry (IHC) and associated text in Explanatory Note C [HER2 (ERBB2) Testing] • Addition of conditionally reported Scoring Methodology for ER, HER2 by IHC and ISH, and optional PgR Scoring Methodology • eCP only ASCII technical updates
3	Central Nervous System	1.0.0.1	1.000.021	• Metadata eCP only change
4	Distal Extrahepatic Bile Duct Accreditation Change	4.4.0.0	3.006.001	• WHO 6th Edition updates to content and explanatory notes • Cover page update to include "Intraductal oncocytic papillary neoplasm without associated invasive carcinoma" as NOT required for accreditation purposes • Updates to Histologic Type, Tumor Extent, and Additional Findings questions
5	Intrahepatic Bile Duct Accreditation Change	4.4.0.0	2.005.001	• WHO 6th Edition updates to content and explanatory notes • Cover page update to include "Intraductal oncocytic papillary neoplasm without associated invasive carcinoma" as NOT required for accreditation purposes • Updates to Histologic Type question and Additional Findings question • Addition of "and / or High-Grade Dysplasia" terminology to Margin Status for High-Grade Intraepithelial Neoplasia question

CAP Cancer Protocols Summary of Changes September 16, 2026

6	Perihilar Bile Duct Accreditation Change	4.4.0.0	2.006.001	• WHO 6th Edition updates to content and explanatory notes • Cover page update to include "Intraductal oncocytic papillary neoplasm without associated invasive carcinoma" as NOT required for accreditation purposes • Updates to Histologic Type, Tumor Extent, and Additional Findings questions • Addition of "and / or High-Grade Dysplasia" terminology to Margin(s) Involved by High-Grade Intraepithelial Neoplasia question
7	GIST, Biopsy	4.4.0.0	2.10.001	• GIST title / lineage is now inclusive of all GIST sites and not limited to stomach • WHO 6th edition updates to content and explanatory notes • Reformatted Tumor Site question • Updates to Histologic Type question, Mitotic Rate instructional Display Item, Treatment Effect Question, and Risk Assessment question
8	GIST, Resection Accreditation Change	4.4.0.0	3.006.001	• GIST title / lineage is now inclusive of all GIST sites and not limited to stomach • WHO 6th Edition updates to content and explanatory notes • Removal of Preresection Treatment question • Reformatted Tumor Site question • Updates to Procedure question, Histologic Type question, Mitotic Rate instructional Display Item, and Treatment Effect Question • pTNM Classification section update to include N Suffix conditionally reported question
9	GIST, Biomarker	1.2.0.0	1.00.001	• GIST title / lineage is now inclusive of all GIST sites and not limited to stomach • Updates to content and explanatory notes • Addition of new section headings "Diagnostic Immunohistochemistry" and "Molecular Subtype Screening" • Update to KIT Exons Assessed question • Update to PDGFRA Mutational Analysis question, now multiselect • Addition of optional NTRK Fusion Gene Analysis question
10	Hematologic, Precursor and Mature Lymphoid Malignancies	1.0.0.2	1.001.001	• Molecular Alterations Detected question updated to include new "Not performed" answer; "BCR::ABL1 p190 fusion transcript", "BCR::ABL1 p210 fusion transcript", and "BCR::ABL1, unspecified transcript" are now list item response answers
11	Hematologic, Myeloid and Mixed/Ambiguous Lineage Neoplasms	1.1.0.2	1.002.001	• Addition of new "Not performed" answer to Molecular Alterations Detected question • FLT3 tyrosine kinase domain (TKD) answer update to remove "p.D865"
12	Kidney Wilms Tumor, Resection Accreditation Change	4.4.1.0	3.006.001	• Minor format updates to include answer positions, addition of conditionality statements, etc. • Update to Explanatory Note F (Staging)
